

HD LOGGING PANEL

SKU: HLP001
Categories: [Cased Hole Wireline](#), [HD Platform™](#), [Surface Acquisition](#), [Surface Systems](#), [Telemetry](#)

PRODUCT DESCRIPTION

The HD Logging Panel (HLP001) is a complete logging panel providing full support for our standard service telemetry. Depth and Line Tension inputs are provided.

In addition to providing tool power to the panel, it also manages communications between the down hole tools and the surface, and from the modem to logging PC.

A single 1U Panel design means that the primary panel and a back up can be transported in a 2U Shipping Box.

Dimensions

Length	19.0 in (482.6 mm)
Width	19.0 in (482.6 mm)
Height	2.0 in (50.8 mm)
Weight	18.0 lb (8.17 kg)
Materials	Corrosion resistant materials used throughout

Hardware Characteristics

Combinability	All HD tools (RADii, iQ, PL, RAS, etc)
Acquisition Mode	Real-time

Electrical Specifications

Voltage (Output)	300V DC
Voltage (Input)	110V AC / 240V AC

Version Control: 2021.12.14

On-line specifications are for REFERENCE ONLY and subject to change without notice. DO NOT USE FOR FIELD OPERATIONS.
